

Maintenance HUB

Maintenance HUB is a Maintenance management company established in April 2010 that specializes in assisting our clients with all their maintenance requirements. Our service encompasses the full spectrum of services required to deliver a professional service to you with the vital combination of necessary **experience**, **expertise** and **capability** as the cornerstone of our proposition. The key success factors of our approach are based upon our ability to fully comprehend our Client's requirements and then deliver them as promised.

Our Services

General Maintenance.

We do it all, from painting to building a garage.
From tiling to removing rubble.

Electrical Work.

We have service level agreements with the certified electricians in place to guarantee our service.

Plumbing Work.

We have a variety of contractors that we use to solve various problems.

Geyser Replacement, maintenance & resulting damages.

We replace geyser according to SANS and do all maintenance to Geysers as well as attending to the resulting damages caused by the incident.

10 Year Maintenance Plan.

We assist in developing a long-term Maintenance Plan for your Complex.

Why use a Maintenance Management Company?

As a service provider yourself, you can acknowledge that maintenance is a large part of your day-to-day work. Why not ask a specialist to assist with your maintenance? Let us assist and manage it for you. We have the system in place to manage all maintenance queries and a 24-hour emergency maintenance number that can be called for urgent cases.

If we can't do it we know someone that can.
